

This guide is for people who want to promote Breaking Free products and earn commission. It matches the Help Center articles under Affiliates.

Live site: <https://breakfreedia.web.app> Help Center: <https://breakfreedia.web.app/support#affiliates>

1. How to become an affiliate

Affiliate login is not email and password. It is separate from My Library and Creator accounts.

What you need:

- An active Breaking Free affiliate member ID (numbers only, for example 12345)
- The same crypto wallet registered to that membership
- A browser wallet such as MetaMask (desktop Chrome, Edge, or Firefox is easiest)

If you already have a member ID:

1. Open Affiliates in the site footer, or go to /affiliates.
2. Choose Become an affiliate. That opens /affiliate/login.
3. Enter your member ID, accept the Affiliate Program Terms and Privacy Policy, connect the registered wallet, and sign a short login message. Signing does not send money.

If you do not have a member ID yet:

1. Open the Help Center and submit a request. Choose topic Affiliate commission.
2. Ask to join the program and include the wallet address you will use.
3. Support replies by email. There is no self-serve email/password signup.

After the first successful login you land on /affiliate/dashboard. Copy a referral link from Discover or My Links. Keep ?ref= and your member ID in the URL.

Help article: /support/become-an-affiliate

2. Benefits of being an affiliate

- Promote books, music, courses, and other listings without inventory, checkout, or shipping. Buyers pay on Breaking Free.
- Product commission is typically 5% of the sale, or a custom rate the creator set. Only listings with affiliate sales enabled pay.
- Earn a one-time 20% USDC bounty on Polygon when a creator who signed up with your link pays for a Creator or Professional plan. That bounty is held for 72 hours so a cancelled plan can be voided.
- Use Discover, personalised links, QR codes, and WhatsApp-ready sharing. Track held, eligible, and paid earnings on the dashboard.
- Earnings are not guaranteed. They depend on real purchases, creator settings, refunds, and the Affiliate

Program Terms.

Help article: </support/affiliate-benefits>

3. How to log in

1. Go to </affiliate/login> (footer Affiliate Sign In, or Become an affiliate on </affiliates>).
2. Enter your numeric member ID.
3. If more than one wallet extension is installed, choose the wallet registered to that membership. Unlock it first.
4. Accept the Affiliate Program Terms, Terms of Service, and Privacy Policy. Complete the security check.
5. Click Connect wallet & sign in. Approve the connection, then Sign the message.
6. You should see Affiliate login successful and open </affiliate/dashboard> with your Member # and shortened wallet address.

If login fails:

- Confirm the member ID is active and you connected the exact registered wallet.
- No Web3 wallet found - install MetaMask (or another wallet), unlock it, and refresh.
- A login challenge can expire. Start again from the login page.

4. Where to see your sales

Sign in, then use the dashboard tabs:

Tab	What you see
Overview	Sales you referred, pending earnings, paid to yo
Discover	Products and creator stores to promote
My Links	Personalised links and QR codes
Earnings	Each referred order and creator recruitment boun
Payments	Withdraw eligible crypto commission from escrow

On Earnings, each product row shows date, product, customer, sale amount, your fee, status, and payout details.

Status is usually Held during the release period, Eligible for payout when the hold has passed, Processing, Paid (ETH or escrow), or Void if the order was refunded or cancelled.

Creator plan bounties are listed on the same page under Creator recruitment bounties. Those are not product sales.

A sale is missing if the buyer did not use a link that still has your ?ref= member ID, affiliate sales are off on that listing, or checkout never completed. Product-specific links convert better than a generic homepage link.

Help article: </support/affiliate-see-sales>

5. How you get paid

Payouts go to the wallet registered with your member ID. A different address cannot receive your commission.

Card (Stripe) sales

- Your share is held for the platform release period (typically 48 hours).
- The platform then sends ETH to your wallet.
- Status moves Held -> Eligible for payout -> Paid (ETH). Batches run on a schedule, so eligible is not always instant.

Crypto (ETH, USDC, or USDT) escrow sales

- Your share is credited on the escrow contract after release.
- Open Payments, connect the same registered wallet, and withdraw on the matching network: Ethereum for ETH, Polygon for USDC and USDT.

Creator recruitment bounties

- 20% of a referred Creator or Professional plan, paid in USDC on Polygon after a 72-hour hold.
- Shown under Creator recruitment bounties on Earnings.

Refunded, disputed, fraudulent, or cancelled orders can void commission, including amounts still on hold. You are responsible for taxes on affiliate income.

Help article: </support/affiliate-get-paid>

6. How commissions work

1. From Discover or My Links, generate a link for a product or creator store.
2. Share it. Do not remove ?ref= and your member ID.
3. Commission is recorded on the referred order when the listing has affiliate sales enabled.
4. Many listings use about 5%. Professional creators can set a custom rate.

Creator recruitment bounties are separate from product commissions. They pay once when a referred creator buys a Creator or Professional plan, after the 72-hour hold.

Example split when a product uses the typical 5% affiliate rate: about 90% creator / 5% platform / 5% affiliate. Without an affiliate: about 95% creator / 5% platform.

Help article: </support/affiliate-commissions>

7. Best practices

- Share links to specific products or creator storefronts.
 - Keep ?ref= in every link you post.
 - Use the same wallet you registered. Login and payouts both depend on it.
 - Check Earnings for status. Eligible does not always mean paid the same minute.
-

8. Troubleshooting

Problem

Login fails

No Web3 wallet found

No commission on a sale

Payout delayed

Wrong network

What to check

Member ID is active; wallet matches the register

Install and unlock MetaMask (or another wallet),

Buyer may not have used your link; affiliate may

Order still in hold, or the payout batch has not

ETH card payouts use Ethereum; USDC/USDT escrow
